PROJECT 2

HTML CODING

INDIVIDUAL PROJECT (10%)

1. DESIGN HTML WEBSITE

You are instructed to create a simple website using HTML programming language. The website must include all criteria below:

1. Page 1: Login Page

A login page using HTML Form with text input type of Name and Password. An enter button from the form will direct the user to Page 2.

2. Page 2: Biography

A biography page introducing yourself that includes all the following:

a. Text

i. Page title.

ii. Text information about yourself which includes a subscript and superscript text and using CSS layout float.

iii. Hypertext in a table of size (2 columns and 3 rows).

b. Image

i. Image slider.

ii. Image centre.

iii. Hyperlink image in a table.

c. Audio

i. Auto play & loop audio.

d. Video

i. Embed video from YouTube.

ii. Embed animation file.

e. Design a send email form.

f. [Geo-location](#) with a map of your address on the page.

g. A website insert as [Iframes](#).

Design and develop your website as creative and attractive as possible. Save file as HTML format and all related files in one folder. Name the folder and HTML files as:

Project_HTML_*StudentID_StudentName*.
